

Application No.: 09/775253

Case No.: 56989US005

Amendments to the Abstract:

On page 25, please replace the abstract that starts on line 5 with the word "Abstract" and ends on line 11 with the word "method" with the following replacement abstract:

A method of manufacturing a touch screen panel, and a touch screen panel made by the method, in which a glass substrate is coated with a resistive layer, a dielectric border layer is deposited on the periphery of the resistive layer, a pattern of conductive edge electrodes is applied to the resistive layer, and a conductive wire trace pattern is applied to the dielectric border layer to electrically isolate the wire trace pattern from the edge electrodes. ~~The invention also features a touch screen panel manufactured in accordance with this method.~~
